

The MJP Ultrajet range excels where high bollard pull and exceptional acceleration is a specified craft requirement and boat speed must not be sacrificed to achieve this.

High Speed High Thrust Waterjets

Higher thrust than jets of an equal size across the entire boat speed range

Features & Benefits

- Superior manoeuvrability. Ability to accelerate quickly, reverse, stop, rotate, hold station and move sideways
- Light weight and compact design with a variety of on jet and remote mounted hydraulic control systems
- Superior static thrust to wet weight ratio of any production waterjet currently available
- Uses high quality production methods to allow volume manufacture at competitive prices

A force to trust

452	450 (17.7)	900 (1200)	2,100		35 (77,140)	55 (121,220)	70 (154,280)

*The maximum power ratings of MJP Ultrajet waterjets are commensurate with the diesel engine manufacturers' duty ratings. Maximum power is also influenced by transmission ratio, jet rpm, boat speed, displacement, hull form, and the vessel's mission.

Note: The standard shaft angle for all models is 0 degrees however many of the above models are also available with a 5 degree shaft angle.
